

DOTS

Dots is a game for 2 or more players.

The first player connects 2 dots vertically or horizontally (not diagonally). The next player does the same. When a player connects 2 dots to complete a square, that player puts his or her initial in the square and gets another turn.

Keep taking turns, connecting dots and completing squares, until all the dots on the grid are connected.

Count up each player's initials on the grid. The one with the most squares wins.

Tip: Avoid putting the third line on a box (enabling you to capture it by adding the fourth line).
